

TradingHours.com

THE MOST TRUSTED SOURCE FOR FINANCIAL CALENDARING REFERENCE DATA.

TradingHours.com offers accurate, easy-to-use market holiday and trading hour data for over 900 markets across 100+ countries worldwide.

INTRODUCTION

Today's constantly changing market can make it difficult to answer simple questions like **"Is the market open now?"** or **"When does the market close for this specific holiday?"**. Yet, it's never been more critical to have these answers provided quickly and accurately. Without quick and accurate answers, there are risks of failed trades, extra interest paid, and added administrative costs—overall, risking the bottom line.

Having the most trusted data source for your financial calendaring reference data is critical to the profitability and reliability of your company. **TradingHours.com** helps take the burden of financial calendaring reference data off your company's shoulders.

WHY TRADINGHOURS.COM?

REDUCE RISKS AND COSTS

Inaccurate data can cause a world of headaches. The data for each market changes more than anyone would expect. That's why many companies, applications, and individuals rely on TradingHours.com to supply them with reliable data to reduce their risks.

Keeping your financial calendaring data up to date can reduce the risk of:

- EXTRA INTEREST PAID
- ADDED ADMINISTRATIVE COSTS
- FAILED TRADES AND TRANSACTIONS
- REPUTATION DAMAGE
- OPERATIONAL RISKS
- PROFIT DECREASING

Monitoring the ever-changing data for all the markets you need will require teams of researchers. TradingHours.com can monitor the data for you—keeping your data second to none while paying a fraction of the cost for an internal team.

WHY TRADINGHOURS.COM?

CONSTANTLY MONITORED, HIGHLY ACCURATE DATA

TradingHours.com's data is collected and verified using only primary sources. We make it easy to extract actionable information.

OUR DATA INCLUDES:

- 
- **CURRENT MARKET STATUS**
 - **CURRENT MARKET PHASE**
 - **NEXT BELL TIME**
 - **HALF-DAYS**
 - **TIMEZONES**
 - **LOCAL TIMES**
 - **HOLIDAY CLOSURES**
 - **PUBLIC**
 - **FX**
 - **UNOFFICIAL**
 - **REGIONAL**
 - **RELIGIOUS**

Our skilled researchers continuously monitor the markets for any schedule changes and communicates any changes quickly, ensuring your data always adheres to the highest standard of accuracy.

As a result, your company can focus on your business while we make sure all your financial calendaring reference data is accurate and up to date at all times. We'll make sure that you have the most accurate financial calendaring data you need to be successful.

Why TradingHours.com?

FLEXIBLE DATA FORMATTING FOR EASE-OF-USE

We understand every business is different. That's why we offer our data in a variety of formats that fit a different set of needs.

All of our data is built to be completely machine-readable and ready for integration into your own application with no manual work to format the data.

UNMATCHED DATA COVERAGE

Our market coverage is second to none and constantly being updated and verified. We are the only source for standardized financial calendar reference data that includes trading schedules for derivative markets.

If we are missing a market you need, we will add it at no additional cost. We have all of your needs covered and will make sure it stays that way.

- 2 Emerging Markets:** Includes Core Markets plus all global equity markets.
- 3 All Markets:** Includes all from Core and Emerging, plus derivative markets.

ABOUT

COMPANY BACKGROUND

TradingHours.com was founded in 2015. We began as a free-to-use online directory of stock exchanges and their trading hours, starting with just a handful of major markets. However, quickly our database grew, and people started asking for direct access to the data.

Our team quickly scaled the data, added more and more markets, and built a comprehensive set of APIs to give customers access to the data directly. As a result, we have constantly been growing, adding more markets and team members to maintain our data's high accuracy.

The customer base we have has grown exponentially. We are proud to be the most reliable source for financial calendar data that our customer's have ever used. We are uniquely positioned to provide accurate data for many markets in a flexible format at an affordable price

DIVERSE TEAM

TradingHours.com has grown globally, including team members in different areas of the globe to ensure the data is monitored 24/7 for our customers. We have a diverse team bringing in a vast skill-set. We are continuously updating our offering to improve for our customers.

FREQUENTLY ASKED QUESTIONS

Q: Do you have support?

A: Absolutely! Our knowledgeable staff will provide technical support for any questions you may have. We are available _____. We respond typically within a business day.

Q: How often is data monitored and updated?

A: Data is monitored and updated daily by our skilled data researchers. They monitor primary sources for any changes, and as soon as they find one, they update our database, which updates the data you have direct access to

Q: Do you report on derivative markets?

A: Yes! We are the only financial calendaring source that includes derivative markets.

Q: How many markets do you cover?

A: Over 900 markets in 100+ countries—and we are constantly adding more!

FREQUENTLY ASKED QUESTIONS

Q: What is a FinID? How is this different from MIC?

A: A FinID is a proprietary ID that more explicitly identifies the market. MIC is not always a unique indicator of a market, as they can overlap. Using MIC alone for a unique identifier can cause a risk of getting the information about the wrong market. To solve this, we look at various market factors, including MIC and more, to uniquely identify it by FinID. We have APIs that will allow you to find the FINID on your own, or you can always contact our support team for any help!

Q: What formats do the data come in?

A: Our data comes in a wide variety of sources. You can download a bulk zip file via API that contains JSON or a CSV. You can download a flat-file in Excel or CSV format. You can also call APIs directly and get JSON returned.

Q: How long has TradingHours.com been around?

A: TradingHours.com has been around for over six years. Our skilled team members have scaled our data quickly and efficiently, uniquely positioning us to provide the highest-quality data at an affordable price in many formats.
